

TOP SECRET PLANNING

25 January 1981

MEMORANDUM FOR: Members, Imagery Planning Subcommittee

FROM : 
Chairman, Imagery Planning Subcommittee

25X1

SUBJECT : Summary of Intelligence Problem Concept for
Mid-80s Imagery Intelligence Management

1. Forwarded herewith, for your information and review, is a copy of the Intelligence Problem (IP) Concept summary paper. The key issues of the concept were briefed to you at the 12 January IPS meeting by 

25X1

2. The Imagery Planning Subcommittee (IPS) has the responsibility to develop the Community's position on the IP Concept. The IPS Exploitation Programs Working Group (EPWG) will--upon its activation in the immediate future--serve as the Community forum for dealing with the IP Concept in depth. The EPWG will work out the details of the IP Concept and assess the utility to the analytical community of its various aspects, returning to the IPS with a recommendation for formal adoption or modification of the concept.

3. This memo and the attached summary paper should alert you to the significance of the IP Concept and the need for its careful assessment. It is therefore particularly important to have the "right people" represent your organization on the EPWG when it is constituted.
